

Wall mount: 1100 - 1750 mm

002.1075 Wall mount with continuous length adjustment 110 - 175 cm, excl. bracket

The SmartMetals wall mounts fit virtually any projector and are available in a range of standard lengths. The 002.10xx series allows the option to choose for a projector specific bracket, this bracket is custom-made for your type and brand of projector. With the design, SmartMetals also takes into account the position of the lens and the projector's centre of gravity. A lot of time and money can be saved while using projector specific brackets at large installations with the same projector. All models can be continuously adjusted in length and include a ball joint that can be adjusted without tools. The universal bracket and your projector can be attached to the ball joint and can be positioned to any direction. The cable duct is easily accessible from the outside and the slotted holes in the wall plate make wall mounting straightforward.

Wall mount: 1100 - 1750 mm

Features
