

Portrait mounting kit

002.1550 Portrait/Floor projection kit for angled sets 002.1560~1561

This mounting kit can be used in combination with the SmartMetals angled mounts to use your projector for floor projection or in portrait position. The set should be fastened in between the projector specific bracket and the ball joint, after which you can pinch the hooks to the projector mount. The mounting kit can be nicely adjusted by means of the nuts so that the projector can be used in a perfect portrait position

Portrait mounting kit
