

L1T: fixed length 130 mm

002.2041 L1T, WHITE 9010, fixed length 13 cm for Trigger clamp, excl. bracket

The 002.20xx series allows the option to choose for a projector specific bracket, this bracket is custom-made for your type and brand of projector. With the design, SmartMetals also takes into account the position of the lens and the projector's centre of gravity. A lot of time and money can be saved while using projector specific brackets at large installations with the same projector. This set is for example suited for truss installation and electrically insulated. All universal tube sets include a ball joint that can be adjusted without tools. The universal bracket and your projector can be attached to the ball joint and can be positioned to any direction.

L1T: fixed length 130 mm
